

IT Strategy Survey

Confident Unsure Not
Confident

Must do

Microsoft doesn't backup your data. Do you have an additional backup solution?

Cyber security affects everything from your business viability to your eligibility to bid for tenders. Do you have a cyber security Essential 8 plan?

Do your company devices have antivirus, and can this be easily demonstrated?

How confident are you that none of your credentials have been leaked?

If your critical services were to cease, could you recover them fast enough so as not to affect your business operations?

Are you confident your firewall is adequate?

Should do

Do you have a comprehensive disaster recovery plan?

Do you have a company data plan?

Have your systems successfully prevented suspicious emails reaching your inboxes?

Are you and your staff using multifactor authentications for all applications?

Do you and your staff know what effective passwords are, and are you using them?

Do you have a budgeted and planned approach to replacing hardware?

Does your current IT provider discuss your Microsoft 365 security score?

Is your critical network infrastructure protected from power surges?

Could do

Do you and your staff efficiently maintain their inboxes?

Are using the Office 365 suite effectively?

Do you have a way to confirm that staff are not clicking suspicious links?

Do you have active and regular cyber training?

Do you have upcoming projects that require planning and IT coordination?

Do you have a list of key vendors to use in emergency situations?

Are you aware of the critical services that cannot afford to be down?
